

Backlog Grooming Meeting Minutes #1

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 7:00 PM

End Time: 8:25 PM

The following user stories were created/discussed/refined/prioritized.

- Prioritized
 - **Regular Cycle Predictions:** As a user, I want the app to predict upcoming cycle dates based on a consistent, regular cycle pattern, so that I can reliably plan ahead for daily life, work, and health needs.
 - **Irregular Cycle Predictions:** As a user, I want the app to adapt its predictions when my cycle is irregular by learning from my historical data over time, so that predictions remain useful even when my cycle does not follow a fixed pattern, whether due to birth control, health conditions, or any external factors.
 - **Accounts and History Sync:** As a user, I want to be able to create and sign into an account to allow me to sync my period history across devices.
 - **Privacy Focused:** As a privacy-conscious user, I would like to know how my data is used, have the agency to choose which specific pieces of data are used, and the ability to export it in a reasonably common format so that I can feel confident my personal health data remains private and under my control.
- Created/Discussed
 - **Personalization:** As a user with specific interests, I would like to choose a look and feel for my app that better represents my personality.
 - **Useful Widgets:** As a user withrebo

- reb
- limited time, I would like to be able to see glances of information from my homescreen or notifications, without needing to open the application.
- **Not Just for Tracking Periods:** As a user who wants to understand my body and habits better, I want the ability to self-report and log other related metrics, not just whether or not I had my period so that I can see the effects of my period over time.
- **Friends and Partners:** As a user who wants to interact with friends and partners through the app, I want to be able to add friends and partners and share certain pieces of information with them.
- **Cycle History:** As a user, I want to see my cycle history, so that I can understand patterns in my periods.
- **Branding and Transparency:** As a user, I would like it for an app to have clear branding and naming, as well as for it to be clear about the application's privacy policy and methodology.

The user stories below are completed.

- **Based on Research:** As a user, I would like the app's predictive features to be rooted in research, science, and trustworthy public datasets so that I can be confident in the app's usefulness as a period tracker.
- **Modern Application:** As a user, I would like it if the application used modern, secure technologies so that I can feel secure with my data and the application will be performant.
