

Sprint Planning Meeting Minutes #2

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:00 PM

End Time: 11:00 PM

After discussion, the velocity of the team was estimated to be:

Going to stick with 30 points per sprint and a total of 210 for the semester.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **Accounts and History:** As a user, I want to be able to create and sign into an account to allow me to sync my period history across devices. **(7 pts)**
- **Regular Cycle Predictions:** As a user, I want the app to predict upcoming cycle dates based on a consistent, regular cycle pattern, so that I can reliably plan ahead for daily life, work, and health needs. **(7pts)**
- **Irregular Cycle Predictions:** As a user, I want the app to adapt its predictions when my cycle is irregular by learning from my historical data over time, so that predictions remain useful even when my cycle does not follow a fixed pattern, whether due to birth control, health conditions, or any external factors. **(7 pts)**
- **Encryption:** As a security conscious user, I'd like to know that my data is stored safely and encrypted to a reasonable extent, even when shared among friends, so that I can be sure it is not used maliciously by the app nor bad actors. **(9 pts)**

The team members indicated their willingness to work on the following user stories.

- Monica Barbosa
 - Irregular Cycle Predictions
- Kristian Correa
 - Regular Cycle Predictions
- Gabriel Garcia
 - Accounts and History
- Marcelo Hernandez
 - Encryption
