

Doe Design System

A warm, soft, cycle-aware interface system across five themes and built on variables, text styles, and component variants in Figma.

TYPOGRAPHY

A warm, editorial feel

Typography is how we express our voice. Doe is inspired by the warm, inky serifs of yesteryear, and our design aims to reflect that comfort and coziness.

Display / XL font/display · Black · 56px	Days, tracked.
Display / L font/display · Black · 40px	Feel at home with Doe!
Display / M font/display · Bold · 28px	A semantic palette.
Heading / L font/serif · Bold · 22px	Your cycle, your rhythm.
Heading / M font/serif · Bold · 17px	Follicular phase
Heading / S font/serif · Bold · 13px	Today
Body / L font/serif · Regular · 16px	A slow reader for quiet mornings — the kind you come back to.
Body / M font/serif · Regular · 14px	Each note is part of a longer story. Doe remembers for you.
Body / S font/serif · Regular · 13px	Logged two hours ago · low mood, high warmth.
Body / Italic font/serif · Italic · 13px	Whisper it to yourself. That counts.
Caption font/serif · Italic · 12px	Captured on a foggy April evening.
UI / M font/sans · Medium · 14px	Add a reflection
UI / S font/sans · Medium · 12px	Save draft
Label font/sans · Bold · 11px	SECTION LABEL
Mono / M font/mono · Regular · 13px	accent/base • #bb573c

ACCESSIBILITY

For everyone

Doe targets WCAG 2.1 AA. Every theme pair (**fg/primary** on **bg/base**, **fg/secondary** on **bg/base**, **fg/primary** on **bg/surface**) clears 4.5:1 for text. Accent on **bg/base** clears 3:1 for non-text indicators.

Focus Interactive elements use a 2px accent/base outline with a 2px offset. Focus never relies on color alone.	Contrast Text pairs meet 4.5:1. Label and Caption styles stay on fg/primary or fg/secondary .
--	---

COLOR TOKENS

A semantic palette

Every color in the system is a variable. Components reference tokens like **accent/base** or **fg/secondary**, and never raw color values. Switching themes re-resolves the palette instantly.

Background 5 bg/base bg/surface bg/surface-hover bg/muted bg/overlay	Foreground 5 fg/primary fg/secondary fg/tertiary fg/muted fg/inverse	Border 4 border/subtle border/default border/strong border/accent

RADIUS

No sharp edges here

Doe trades hard corners for soft ones. Smaller radii stay crisp in dense UI; larger radii belong to moments that want to feel like objects; cards, pills, theme tiles.

radius/sm 8PX	radius/md 12PX	radius/lg 16PX
radius/xl 20PX	radius/full FULL	

SPACING

Plenty of space

Spacing builds predictable rhythm between elements. Built on a 4px base; each step nudges up by 4–8px so jumps feel intentional without being jarring.

spacing/xs 4PX	spacing/sm 8PX	spacing/md 12PX	spacing/lg 16PX
spacing/xl 20PX	spacing/2xl 24PX	spacing/3xl 32PX	

Doe

A cozy app for when there's lots of noise.
