All stories

All of the stories worked on across the following meetings:

- Based on Research
- Privacy Focused
- Modern Application
- Regular Cycle Predictions
- Irregular Cycle Predictions
- Accounts and History Sync
- Encryption
- Branding and Transparency
- Accounts and History Sync Database Design
- App Introduction
- Encryption and Backend Setup
- Design and User Flow
- User Symptom History Database Design
- Friends and Partners
- Personalization
- Useful Widgets
- User Account Authentication
- Symptom Entry Interface
- Data Visualization
- Document and Integrate Project

1-12-Sprint Planning Meeting Minutes 1

Sprint Planning Meeting Minutes (1/12/2026):

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start time: 1/12/2026, 7:00 PM

End time: 10:00 PM

After discussion, the velocity of the team was estimated to be 30 points/sprint, totalling 210 for 7 sprints.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

1. **Based on Research:** As a user, I would like the app's predictive features to be rooted in research, science, and trustworthy public datasets so that I can be confident in the app's usefulness as a period tracker.
2. **Privacy Focused:** As a privacy-conscious user, I would like to know how my data is used, have the agency to choose which specific pieces of data are used, and the ability to export it in a reasonably common format so that I can feel confident my personal health data remains private and under my control.
3. **Modern Application:** As a user, I would like it if the application used modern, secure technologies so that I can feel secure with my data and the application will be performant.

The team members indicated their willingness to work on the following user stories.

- Gabriel Garcia
 - 3. Modern Application
- Kristian Correa
 - 1. Based on Research
- Marcelo Hernandez
 - 2. Privacy Focused
- Monica Barbosa
 - 1. Based on Research

Backlog Grooming Meeting Minutes #1

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 7:00 PM

End Time: 8:25 PM

The following user stories were created/discussed/refined/prioritized.

- Prioritized
 - **Regular Cycle Predictions:** As a user, I want the app to predict upcoming cycle dates based on a consistent, regular cycle pattern, so that I can reliably plan ahead for daily life, work, and health needs.
 - **Irregular Cycle Predictions:** As a user, I want the app to adapt its predictions when my cycle is irregular by learning from my historical data over time, so that predictions remain useful even when my cycle does not follow a fixed pattern, whether due to birth control, health conditions, or any external factors.
 - **Accounts and History Sync:** As a user, I want to be able to create and sign into an account to allow me to sync my period history across devices.
 - **Privacy Focused:** As a privacy-conscious user, I would like to know how my data is used, have the agency to choose which specific pieces of data are used, and the ability to export it in a reasonably common format so that I can feel confident my personal health data remains private and under my control.
- Created/Discussed
 - **Personalization:** As a user with specific interests, I would like to choose a look and feel for my app that better represents my personality.
 - **Useful Widgets:** As a user withrebo

Sprint Retrospective Meeting Minutes #1

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:30 PM

End Time: 10:00 PM

What went wrong?

- Did we do a good job estimating our team's velocity?
 - We underestimated the velocity.
- Did we do a good job estimating the points (time required) for each user story?
 - No we overestimated how many points the **Modern Application** and **Based on Research** stories would take.
- Did each team member work as scheduled?
 - Yes, everyone did their work and attended meetings.

What went right?

- Everyone worked on schedule, did good research, and was on top of their stories and tasks.

How to address the issues in the next sprint?

- How to improve the process?
 - Play it less safe with estimates on stories.
- How to improve the product?
 - Continue to lay a good foundation for the product as we have been doing.
 - Combining research with design

Sprint Review Meeting Minutes #1

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:00 PM

End Time: 9:30 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- Modern Application (10 pts)
- Based on Research (10 pts)
- Privacy Focused (10 pts)

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Sprint Planning meeting.

- Irregular Cycle Predictions (7 pts)
- Regular Cycle Predictions (7 pts)
- Accounts and History Sync (7 pts)

Sprint Planning Meeting Minutes #2

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:00 PM

End Time: 11:00 PM

After discussion, the velocity of the team was estimated to be:

Going to stick with 30 points per sprint and a total of 210 for the semester.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **Accounts and History:** As a user, I want to be able to create and sign into an account to allow me to sync my period history across devices. **(7 pts)**
- **Regular Cycle Predictions:** As a user, I want the app to predict upcoming cycle dates based on a consistent, regular cycle pattern, so that I can reliably plan ahead for daily life, work, and health needs. **(7pts)**
- **Irregular Cycle Predictions:** As a user, I want the app to adapt its predictions when my cycle is irregular by learning from my historical data over time, so that predictions remain useful even when my cycle does not follow a fixed pattern, whether due to birth control, health conditions, or any external factors. **(7 pts)**
- **Encryption:** As a security conscious user, I'd like to know that my data is stored safely and encrypted to a reasonable extent, even when shared among friends, so that I can be sure it is not used maliciously by the app nor bad actors. **(9 pts)**

Backlog Grooming Meeting Minutes

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 8:00 PM

End Time: 9:00 PM

The following user stories were created/discussed/refined/prioritized.

- **Prioritized:**
 - **Accounts and History:** As a user, I want to be able to create and sign into an account to allow me to sync my period history across devices.
 - **Encryption and Backend Setup:** As a user, I want my data to be encrypted and my privacy respected.

The user stories below are completed.

- **Regular Cycle Predictions:** As a user, I want the app to predict upcoming cycle dates based on a consistent, regular cycle pattern, so that I can reliably plan ahead for daily life, work, and health needs.
- **Irregular Cycle Predictions:** As a user, I want the app to adapt its predictions when my cycle is irregular by learning from my historical data over time, so that predictions remain useful even when my cycle does not follow a fixed pattern, whether due to birth control, health conditions, or any external factors.
- **Encryption:** As a security conscious user, I'd like to know that my data is stored safely and encrypted to a reasonable extent, even when shared among friends, so that I can be sure it is not used maliciously by the app nor bad actors.

Sprint Retrospective Meeting Minutes #2

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:30 PM

End Time: 10:00 PM

What went wrong?

- Did we do a good job estimating our team's velocity?
 - We oversteimated the velocity.
- Did we do a good job estimating the points (time required) for each user story?
 - No we underestimated how many points the **Accounts and History** and **Encryption** stories would take.
- Did each team member work as scheduled?
 - Yes.

What went right?

- Everyone worked on time, focused, and delivered.

How to address the issues in the next sprint?

- How to improve the process?
 - Again, try to find the balance of estimating story points. First sprint we made things too easy, this time we stacked too much for the sprint.
- How to improve the product?
 - Finish up on the **Accounts and History** and **Encryption Stories**. Utilize the research from the two predictions data related stories to implement.

Sprint Review Meeting Minutes #2

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:00 PM

End Time: 9:30 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- **Regular Cycle Predictions** (7 pts)
- **Irregular Cycle Predictions** (7 pts)

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Sprint Planning meeting.

- **Accounts and History** (7pts)
- **Encryption** (7pts)

Sprint Planning Meeting Minutes #3

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:00 PM

End Time: 10:00 PM

After discussion, the velocity of the team was estimated to be:
30 points this sprint.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **Branding and Transparency (8):** As a user, I would like it for an app to have clear branding and naming, as well as for it to be clear about the application's privacy policy and methodology.
- **Accounts and History Sync Database Design (15):** As a user, I want to be able to create and sign into an account to allow me to sync my period history across devices.
- **App Introduction (7):** As a user, I'd like the first interaction I have with the app to be welcoming and

The team members indicated their willingness to work on the following user stories.

- Monica Barbosa
 - **Accounts and History Sync Database Design**
- Kristian Correa
 - **Accounts and History Sync Database Design**

Backlog Grooming Meeting Minutes #3

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:00 PM

End Time: 10:00 PM

The following user stories were created/discussed/refined/prioritized.

- Prioritized / Continue
 - Accounts and History: As a user, I want to be able to create and sign into an account to allow me to sync my period history across devices.
 - Encryption and Backend Setup: As a user, I want my data to be encrypted and my privacy respected.

The user stories below are still in progress and were further discussed and refined during this session.

- Accounts and History: Continued discussion around epic breakdown, acceptance criteria, and future sprint placement.
- Encryption and Backend Setup: Continued refinement of scope, technical considerations, and dependencies affecting future sprints.

No user stories were completed during this backlog grooming session.

The team agreed to continue working on the same items in the upcoming sprint.

Sprint Retrospective Meeting Minutes #3

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 7:00 PM

End Time: 8:00 PM

What went wrong?

- Did we do a good job estimating our team's velocity?
 - No, we overestimated our velocity.
- Did we do a good job estimating the points (time required) for each user story?
 - No, we underestimated every story.
- Did each team member work as scheduled?
 - Yes, but we had a tough time with scheduling this sprint.

What went right?

- Communication, research and patience.

How to address the issues in the next sprint?

- How to improve the process?
 - Make better estimates.
- How to improve the product?
 - Continue implementing the designs.

Sprint Review Meeting Minutes #3

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 7:00 PM

End Time: 8:00 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- No stories finished.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

- **Branding and Transparency (8):** As a user, I would like it for an app to have clear branding and naming, as well as for it to be clear about the application's privacy policy and methodology.
- **Accounts and History Sync Database Design (15):** As a user, I want to be able to create and sign into an account to allow me to sync my period history across devices.
- **App Introduction (7):** As a user, I'd like the first interaction I have with the app to be welcoming and

Sprint Planning Meeting Minutes #4

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:00 PM

End Time: 10:00 PM

After discussion, the velocity of the team was estimated to be:
30 points this sprint.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **Design and User Flow (8):** As a user, I want the apps I use to have a clean and functional design and easy to navigate user flows so that I have an easy time navigating and using the app.
- **User Symptom History Database Design (15):** As a user, I want to be able to track my symptom history and view a history of my previous days.
- **App Introduction (7):** As a user, I'd like the first interaction I have with the app to be welcoming and

The team members indicated their willingness to work on the following user stories.

- Monica Barbosa
 - **User Symptom History Database Design**
- Kristian Correa
 - **User Symptom History Database Design**
- Gabriel Garcia

Sprint Retrospective Meeting Minutes #4

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:30 PM

End Time: 10:00 PM

What went wrong?

- Did we do a good job estimating our team's velocity?
 - No, we overestimated velocity.
- Did we do a good job estimating the points (time required) for each user story?
 - No, every story was underestimated.
- Did each team member work as scheduled?
 - Yes, everyone worked as schedule.

What went right?

- Coordination, meeting, planning; implementation details was where things went more wrong.

How to address the issues in the next sprint?

- How to improve the process?
 - Familiarize ourselves with Figma and other related tools more.
- How to improve the product?
 - Continue base implementation.

Sprint Review Meeting Minutes #4

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:00 PM

End Time: 9:30 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- None of the stories were finished this sprint, underestimated required points.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Sprint Planning meeting.

- **Design and User Flow (8):** As a user, I want the apps I use to have a clean and functional design and easy to navigate user flows so that I have an easy time navigating and using the app.
- **User Symptom History Database Design (15):** As a user, I want to be able to track my symptom history and view a history of my previous days.
- **App Introduction (7):** As a user, I'd like the first interaction I have with the app to be welcoming and

Sprint Planning Meeting Minutes #5

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:00 PM

End Time: 10:00 PM

After discussion, the velocity of the team was estimated to be:
28 points this sprint.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **Design and User Flow (9):** As a user, I want the app to have an intuitive layout and smooth navigation so that I can easily move through features without confusion.
- **User Symptom History Database Design (13):** As a user, I want to log and access my symptom history in a structured way so that I can track patterns over time.
- **App Introduction (6):** As a user, I want an engaging and clear onboarding experience so that I understand how to use the app from the start.

The team members indicated their willingness to work on the following user stories.

- Monica Barbosa
 - **User Symptom History Database Design**
- Kristian Correa
 - **User Symptom History Database Design**

Backlog Grooming Meeting Minutes #5

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 9:00 PM

End Time: 10:00 PM

The following user stories were created/discussed/refined/prioritized.

- **Prioritized:**
 - **Friends and Partners (15):** As a user, I want to be able to add friends and partners and share certain pieces of information with them.
 - **Personalization (15):** As a user with specific interests, I would like to choose a look and feel for my app that better represents my personality.

The user stories below are completed.

- **Design and User Flow (8):** As a user, I want the apps I use to have a clean and functional design and easy to navigate user flows so that I have an easy time navigating and using the app.
- **User Symptom History Database Design (15):** As a user, I want to be able to track my symptom history and view a history of my previous days.
- **App Introduction (7):** As a user, I'd like the first interaction I have with the app to be welcoming and

Sprint Retrospective Meeting Minutes #5

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:00 PM

End Time: 10:30 PM

What went wrong?

- Did we do a good job estimating our team's velocity?
 - The team's velocity was mostly accurate, but some tasks took slightly longer than expected due to additional clarification and refinement.
- Did we do a good job estimating the points (time required) for each user story?
 - Point estimate were generally reasonable, though some stories required more time for planning and discussion than initially anticipated.
- Did each team member work as scheduled?
 - Yes, all team members stay consistent with their work and contributed as expected.

What went right?

- The team communicated effectively and maintained steady progress through the sprint.
- Tasks were clearly divided, allowing each member to focus on their assigned areas.
- The completed user stories were successfully prepared and accepted during the review.

How to address the issues in the next sprint?

- How to improve the process?

Sprint Review Meeting Minutes #6

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:30 PM

End Time: 11:00 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- **Branding and Transparency (8):**
- **Accounts and History Sync Database Design (15):**
- **App Introduction (7):**

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

- N/A

Sprint Planning Meeting Minutes #7

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:00 PM

End Time: 11:00 PM

After discussion, the velocity of the team was estimated to be:

26 points this sprint.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **User Account Authentication (10):** As a user, I want to create and log into an account so that my data is securely stored and accessible across sessions.
- **Symptom Entry Interface (8):** As a user, I want an easy way to input my daily symptoms so that tracking feels quick and intuitive.
- **Data Visualization (8):** As a user, I want to see simple visual summaries of my cycle and symptoms so that I can better understand patterns over time.

The team members indicated their willingness to work on the following user stories.

- **Monica Barbosa**
 - Symptom Entry Interface
- **Kristian Correa**
 - Data Visualization
- **Gabriel Garcia**
 - User Account Authentication

4-06_Backlog

Backlog Grooming Meeting Minutes #6

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:30 PM

End Time: 11:30 PM

The following user stories were created/discussed/refined/prioritized.

- **Prioritized:**
 - **User Account Authentication (10):** As a user, I want to create and log into an account so that my data is securely stored and accessible across sessions.
 - **Symptom Entry Interface (8):** As a user, I want an easy way to input my daily symptoms so that tracking feels quick and intuitive.
 - **Data Visualization (8):** As a user, I want to see simple visual summaries of my cycle and symptoms so that I can better understand patterns over time.

The user stories below are completed.

- No stories completed in this sprint yet. Continuing with the list from planning meeting, looking on pace to finish them by end of sprint.

4-12_Sprint Retrospective Meeting Minutes 7–1

Sprint Retrospective Meeting Minutes #6

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:00 PM

End Time: 10:30 PM

What went wrong?

- Did we do a good job estimating our team's velocity?
 - The team's velocity was mostly accurate, but some tasks required additional refinement, which extended completion time slightly.
- Did we do a good job estimating the points (time required) for each user story?
 - Point estimates were generally reasonable, but certain stories, especially those involving UI structure and data representation, required more time for iteration and alignment than expected.
- Did each team member work as scheduled?
 - Yes, all team members remained consistent with their work and contributed as expected.

What went right?

- The team maintained strong communication and consistent progress throughout the sprint.
- The Symptom Entry Interface, authentication flow, and data visualization planning were all successfully completed.
- Tasks were clearly divided, allowing each member to stay focused on their responsibilities.
- All user stories were completed, reviewed, and accepted without major issues.

How to address the issues in the next sprint?

- How to improve the process?
 - Spend more time at the beginning of the sprint clarifying requirements and identifying potential edge cases.
 - Align earlier on design and structure decisions to reduce repeated refinements later.
- How to improve the product?

4-12_Sprint Review – Sprint 7–1

Sprint Review – Sprint #7

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 7:00 PM

End Time: 8:00 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- **Symptom Entry Interface**
- **Authentication Flow**
- **Data Visualization Planning**

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Sprint Planning meeting:

- None

Sprint Planning Meeting Minutes #8

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:00 PM

End Time: 11:00 PM

After discussion, the velocity of the team was estimated to be:

30 points this sprint.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **Document and Integrate Project (30):** As a team member, I want to consolidate our diagrams, designs, and documentation. and local repository branches into our organizational GitHub repo.

The team members indicated their willingness to work on the following user stories.

- **Monica Barbosa**
 - Document and Integrate Project
- **Kristian Correa**
 - Document and Integrate Project
- **Gabriel Garcia**
 - Document and Integrate Project
- **Marcelo Hernandez**
 - Document and Integrate Project

Backlog Grooming Meeting Minutes #7

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:30 PM

End Time: 11:00 PM

The following user stories were created/discussed/refined/prioritized.

- **Refined / In Progress:**
 - **Document and Integrate Project (30):** As a team member, I want to consolidate our diagrams, designs, documentation, and local repository branches into a centralized organizational GitHub repository so that all project components are unified and accessible.

No additional user stories were introduced at this time, as the team agreed to **focus entirely on completing and refining the current integration effort.**

Sprint Retrospective Meeting Minutes #7

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 10:00 PM

End Time: 10:30 PM

- Did we do a good job estimating our team's velocity?
 - The team's velocity was mostly accurate.
- Did we do a good job estimating the points (time required) for each user story?
 - Point estimates were reasonable and realistically achievable.
- Did each team member work as scheduled?
 - Yes, all team members remained consistent with their work and contributed as expected.

What went right?

- The team maintained strong communication and consistent progress throughout the sprint.

How to address the issues in the next sprint?

- No further sprints.

Sprint Review Meeting Minutes #8

Attendees: Monica Barbosa, Kristian Correa, Gabriel Garcia, Marcelo Hernandez

Start Time: 11:00 PM

End Time: 11:30 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- **Document and Integrate Project (30):** Completed. All diagrams, designs, documentation, and repository work were successfully consolidated and integrated.

All stories completed.
